SOFTWARE DEVELOPER

Víctor González

EXPERIENCE

Mar 2022 Present

HYBRID DEVELOPER
Airbus Defence and Space. Getafe, Spain

Aerospace calculator app for military inflight operations. As the first member of the team, I initiated the development process from scratch, taking it through to production.

Our work involves resolving a wide array of technical challenges, such as creating **custom capacitor plugins** (iOS/electron), developing **python scripts for automating processes and file encryption**, designing custom themes and animations, **building angular libraries**, **upgrading legacy projects** to cutting-edge technology, and **configuring Linux servers**.

Tech Stack: *Angular (5 to 16), Capacitor 5, Ionic (3 to 6), Electron, Bootstrap, NodeJS, Python, iOS, MacOS, Linux and Windows*

Feb 2021 Mar 2022

ANGULAR DEVELOPER
Kubide Tech Builder. Madrid, Spain

The main project involved developing a custom **CRM** for a Real Estate company. This opportunity allowed me to work with highly skilled developers, I acquired knowledge in **coding best practices, design patterns, and communication skills**. This experience enhanced my proficiency in integrating Angular applications with backend APIs through **HTTP services and RESTful APIs.**

I also worked providing support for mobile applications for StartUps, related to **delivery and criptocurrencies.**

Tech Stack: *Angular 13, Ionic, Bootstrap, Typescript, JavaScript, bash scripting, Linux, NestJS*

Sep 2020 Dec 2020

ANGULAR DEVELOPER
Metrica Consulting S.L.. Madrid, Spain

I had the opportunity to work on an **internal CRM** for the company. I collaborated with more than 27 people from different places. This project allowed me to develop my programming skills, while improving my teamwork and collaboration skills in a remote environment.

Tech Stack: *Angular 8, Bootstrap, Angular Material, Typescript*

EDUCATION

Sep 2018 Dec 2020

MULTIPLATFORM APPS DEVELOPER
IES Barajas. Madrid, Spain
